ELECTION/RESTRICTIONS

1. The restriction requirement mailed on 06/05/07 has been reconsidered in view of the allowability of claims to the elected invention. The restriction requirement is hereby withdrawn since non-elected claims 3-9, 11 and 13 have similar allowable limitations as that of allowable claims 1, 2, 10, 12 and 14.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Fournier on 11/20/08.

The application has been amended as follows:

IN THE CLAIMS:

Claim 1, line 16, right before “predetermined period”, replace “a” with --the--;

lines 17-18, replace lines 17 and 18 with --a storage device which stores a target sampling value that serves as a target for the light intensity level of the light beam;--;

line 23, replace “APC” with --automatic power control--.

Claim 2, line 3, delete “as a sampling value”.

Claim 3, lines 21-22, replace lines 21-22 with --a storage device which stores a target sampling value that serves as a target for the light intensity level of the light beam;--;

line 26, after “error”, insert --wherein an automatic power control timing period is regarded as the predetermined period--.

Cancel claims 4-6.

Claim 7, line 1, replace “claim 3” with --claim 6--; and

line 2 change “a single-pulse beam” to --the single-pulse beam--.

Cancel claims 8-9.

Claim 10, line 16, right before “predetermined period”, replace “a” with --the--;

lines 17-19, replace lines 17-19 with --an error calculation process of calculating error between the acquired sampling value and a target sampling value, wherein the target sampling value that serves as a target for the light intensity level of the light beam and is prestored in a storage device; and--;

line 22, replace “APC” with --automatic power control--.

Claim 11, lines 22-24, replace lines 22-24 with --an error calculation process of calculating error between the acquired sampling value and a target sampling value, wherein the target sampling value that serves as a target for the light intensity level of the light beam and is prestored in a storage device; and--;

line 26, after “process”, insert --wherein an automatic power control timing period is regarded as the predetermined period--.

Claim 12, line 19, right before “predetermined period”, replace “a” with --the--;

lines 20-22, replace line 20-22 with -- an error calculation process of calculating error between the acquired sampling value and a target sampling value, wherein the target sampling value that serves as a target for the light intensity level of the light beam and is prestored in a storage device; and--.

line 25, replace “APC” with --automatic power control--.

Claim 13, lines 23-25, replace lines 23-25 with --an error calculation process of calculating error between the acquired sampling value and a target sampling value, wherein the target sampling value that serves as a target for the light intensity level of the light beam and is prestored in a storage device; and--;

line 27, after “error”, insert --wherein an automatic power control timing period is regarded as the predetermined period--.

IN THE DRAWINGS

In Fig. 6 of a replacement sheet filed 8/21/08, step S15, change “EMIT ONLY AN ERASE PULSE AS A SINGLE-PULSE” to --EMIT ONLY ERASE PULSES AS SINGLE-PULSES--.

In order to avoid abandonment of the application, applicant must make the above upon drawing changes.

The above change of Fig. 6 is to make it to be consistent with what disclosed in the specification, page 39, lines 3-6. The support for “multi-pulse beam” and “single-pulse beam” as recited in claims have been found in the specification (see the respective disclosure of Fig. 6, step S15; Fig. 14, step S56 or Fig. 17, step S76 for example).

REASONS FOR ALLOWANCE

3. The following is an examiner’s statement of reasons for allowance: claims 1-3, 7, 10-14 are allowable over the prior art of record because the prior art of record, considered alone or in combination fails to suggest or fairly teach the use of an emission device, a detection device, an

acquisition device, an error calculation device and a control device functionally and relatively operated in combination as particularly recited in claims 1, 3, 12 and 13, and corresponding functional method claims 10 and 11. Claims 2, 7 and 14 are allowed with their respective parent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thang V. Tran whose telephone number is (571) 272-7595. The examiner can normally be reached on M-F 9:00AM-5:30PM.
